

Hang it up with Clicky Notes

🕒 varies

- 📁 • System Cards
- Single hole punch
- 1 x 1 LEGO plates
- LEGO Base plates

Why?

There are various situations where you will want to be able to **hang or place a note** in a particular position. This is an alternative way to hold notes in place to using sticky putty that mark your walls or sticky notes that are easily dislodged over time.

What?

By using the strong bond between LEGO® bricks when they are clicked together, this approach allows you to attach notes to vertical or horizontal surfaces (covered with LEGO base plates).

How?
